SuperWomen in Flash to Host Peer Exchange Event at Flash Memory Summit 2022

Rapid Peer Exchange and Networking Event Sponsored by Intel and Western Digital

SANTA CLARA, CA – July 27, 2022 – The Flash Memory Summit (FMS) along with two of their leading sponsors, Intel and Western Digital, is excited to host the fourth annual [SuperWomen in Flash event](#) at [Flash Memory Summit 2022](#). This year's event will include a rapid Peer Exchange – covering everything from Flash technologies to career lessons from the pandemic. Kicking off the session will be the SuperWomen in Flash Leadership Award winner, bringing her perspectives on women in the industry and driving more top talent to address the pressing needs of the data driven economy.

During the Peer Exchange, you are guaranteed to meet new, super talented women and men and gain exciting insight to build on your business and career. Participants are paired up for quick, ten minute discussions per topic and then rotate to meet with the next group to continue networking and gathering more knowledge.

The event will be held Wednesday, August 3, 2022, 4:00 pm – 6:30 pm PT at the Hyatt Regency next to the Santa Clara Convention Center. Come early to enjoy a happy hour and networking. The event is complementary and open to all (and we definitely encourage ALL genders to join).

“The FMS event is a fabulous vehicle for gathering and sharing knowledge. The SuperWomen in Flash builds on its success with executives and up-and-comers sharing their experiences in the industry,” says Camberley Bates, Managing Director, Evaluator Group and founder of SuperWomen in Flash. “The ultimate goal is to encourage and help more women to enter and succeed in our marketplace.”

The SuperWomen in Flash event presents an excellent opportunity to network, enjoy food and libations, and then explore the Flash Memory Summit exhibit hall to discover the latest advances in Flash memory technology.

[Registration](#) not required but appreciated.

About Flash Memory Summit

Flash Memory Summit showcases the industry's key applications, technologies, vendors, and innovative startups that are driving the multi-billion dollar non-volatile memory and SSD markets. Now in its 15th year, FMS is the world's largest event featuring the trends, innovations, and influencers driving the adoption of flash memory in demanding enterprise storage applications, high-performance computing, AI/ML, the cloud, and mobile and embedded systems.
