Flash Memory Summit Announces August 2-4, 2022 In-Person Event

The 16th Annual FMS Conference will Bring Together Data Storage Vendors and IT Storage Professionals to Learn about the Latest Advances in Flash Memory and Storage Solutions

SANTA CLARA, CA – JANUARY 26, 2022 – Flash Memory Summit (FMS), the largest conference featuring memory and its storage applications, today announced it will hold its 16th annual conference as a live in-person event on August 2-4, 2022, at the Santa Clara Convention Center. By returning to an in-person event, FMS will offer a welcome opportunity to bring together the industry's leading vendors and many emerging storage startups, along with channel partners offering total storage solutions, and IT professionals from around the world. FMS offers the best industry opportunity to explore the latest data storage standards and the newest memory technology innovations and product advances, which together enable the creation of the most competitive, high-performance storage solutions for on-premise data centers along with hybrid and multi-cloud infrastructure.

In-person FMS will include:

- **Keynotes and presentations** from leading storage providers, and from emerging storage startups that are launching at FMS
- **Expert insights** on high-performance storage applications such as real-time analytics, AI/ML, big data, hyperscale, and cloud infrastructure environments
- **Chat with the Experts:** An evening of pizza, beer and conversation with subject matter experts from whom you can get real answers to your most challenging questions
- **Annual awards and recognition programs**, including:
 - **Lifetime Achievement Award** recognizing the most distinguished industry leaders who have pioneered the development and use of non-volatile memory
 - **Best of Show Awards** recognizing product innovations spanning varied solutions of hardware, software, and services, and which address the most demanding customer applications
 - **SuperWomen in Flash Award** recognizing the most outstanding leadership of women in the storage industry
- **Network with all of the major companies** in the Exhibit Hall, and engage in conversations with your colleagues

“We are excited to bring back together flash memory vendors, channel partners and the customer community for an interactive experience,” said Jay Kramer, FMS Co-Founder and Keynote Master of Ceremonies. “There is nothing like an in-person event where you can meet one-on-one with the industry’s leading analysts, attend interesting technology sessions, listen to inspiring keynote presentations, and discover new innovative vendor solutions.”

About Flash Memory Summit

Flash Memory Summit, produced by Conference ConCepts, showcases the mainstream applications, key technologies, leading vendors and innovative startups driving the multi-billion-dollar non-volatile memory and SSD markets. FMS is the world’s largest event showcasing the trends, innovations, and influencers driving the adoption of flash memory in demanding enterprise storage applications, high-performance computing, and mobile and embedded systems.
